

**Project FOCUS  
Best Lessons  
KINDERGARTEN**

**Title of Lesson:** Planting Flowers

**Theme:** Life Science

**Unit Number:** 6      **Unit Title:** Plants and Animals

**Performance Standard(s) Covered (enter codes):**

SKL2

SKCS4

**Enduring Standards (objectives of activity):**

**Habits of Mind**

- Asks questions
- Uses numbers to quantify
- Works in a group
- Uses tools to measure and view
- Looks at how parts of things are needed
- Describes and compares using physical attributes
- Observes using senses
- Draws and describes observations

**Content (key terms and topics covered):**

Plant needs, life cycle

**Learning Activity (Description in Steps)**

**Abstract (limit 100 characters):** This lesson reinforces what a plant needs to grow.

**Details:** When I arrived, I verbally quizzed the students on what I had taught them about plants the class before. We said the plant cycle together aloud and talked about why the plant is a living thing. Then, I broke the news that today we were going to plant our very own seeds. The kids were so excited that they were going to be able to take their flowers home after they have finished growing. I had the class sit in a semi circle, and I called each child up to the front by his or her initials to plant the seeds in the dirt. I handed the student two seeds. Then, the student dropped the seeds in the slot and packed dirt on top of the seed. I assisted students if they asked for my help; otherwise I let them do it on their own.

I completed the potting with watering the newly planted seeds.

We ended the lesson with reading The Tiny Seed.

**Materials Needed (Type and Quantity):**

Potting soil

Seeds

A cup for scooping dirt

Carton

Water

## **The Tiny Seed by Eric Carle**

### **Notes and Tips (suggested changes, alternative methods, cautions):**

**This lesson needs to be done early in the semester to allow the seeds to grow before FOCUS ends. I chose seeds that seemed relatively hardy and would not require strict conditions and did not have a long germinating time. I bought a carton (in the gardening section of Wal-Mart) that easily facilitated growing flowers indoors.**
